

# TRAINING

## Recommendations for publishing in international journals

13th February 2025 (Thursday)  
4h30 – 6h30 p.m. • online (via Zoom meeting)

### Target audience

Teachers, researchers and graduate students (but enrolment open to anyone interested)

### Aims

This presentation provides recommendations for publishing in international journals, focusing on selecting the right journal, writing high-quality papers, and improving impact. Key factors include choosing journals based on databases and impact factor, publishing innovative research with global relevance, and ensuring high-quality writing and formatting. It emphasizes the importance of a well-organized structure, critical proofreading, and responding constructively to reviewer feedback. Lastly, it suggests strategies to enhance the visibility and citations of published work, including selecting the right journals and leveraging online platforms.

### Programme

1. Types of journals and how to select a journal
2. What to publish (or investigate) and what is not worth trying to publish
3. Decisive factors for papers acceptance
